Time flies like an arrow.

Stay ...

The German Association for Materials Research and Testing (DVM) promotes knowledge transfer and networking in the wide area of materials research and structural testing.

... in touch!

We provide a forum for intersectoral contact and exchange between science and technology, universities and industry.

The DVM has a growing number of members, which operate in the automotive and supplying industry, system vendors, research establishments, universities and public authorities.

... innovative!

21st century technical innovation and the latest expertise meet more than 110 years of scientific and industrial tradition:

The DVM was founded not later than 1896.

Our working groups:

- Fracture processes
- Service strength
- Biomaterials
- Reliability of mechatronic and adaptronic systems
- Scanning electron microscopy in materials testing
- Mechanical characterisation in small dimensions

Don't mark time struggling on
your own...

Find problem solvers in the DVM!

We keep you up-to-date.

... progressive!

The DVM conducts national and international conferences, workshops and seminars.

Thanks to first class contributors from science and industry, our events are related to practice and always up-to-date. Experience a blend of lectures, posters and exhibitions plus interesting factory visits!

For further reference, we recommend the conference proceedings.

The German Association for Materials Research and Testing operates nationwide - and beyond the borders.

DVM awards, such as the Erich Siebel Medallion or the August Wöhler Medal are appreciated worldwide. The DVM also encourages the academic offspring.

... informed!

Our newsletter, the *DVM-Nachrichten*, is released three or four times a year, spreading information from the world of materials research and testing. We report on the latest events, awards and activities of our working groups. Besides, well-known personalities comment on recent issues of technique and society.

Bet on the wrong material?

We won't leave you out in the rain!

Are you interested in a **DVM membership**? Are you occupied with questions concerning component design or the research and testing of materials? Join the DVM! There is the right membership for everyone: Corporate membership for companies, institutes and authorities, personal membership for all individuals, self-evidently including retirees and students. Get involved in one of our working groups and benefit!

Are you looking for the solution to a specific problem, for helpful suggestions or the latest trends? Do you wish to present your scientific project to a competent audience? The experts are here, and the DVM is what you make it!

See our website www.dvm-berlin.de for the latest information on a DVM membership, for programmes of our conferences and seminars and our large archive of publications.

Welcome to the DVM!
